ORENDA ... a new power in the Jet Age!

Orenda Engines begins its corporate life with an established record of engineering and production achievement, with management and policies unaltered and with the same goal...leadership in the field of aerial propulsion.

From Orenda's design, development and production departments came the first all-Canadian jet engine to power the CF-100 and F-86 Sabres V and VI. Since September, 1952, the company has delivered over 1,500 Orendas. Expanded research facilities are now under construction to deal with the increasingly complex power requirements of the future.

The 6,000 people in the Orenda family are dedicated to designing, manufacturing, maintaining and servicing modern jet engines and other forms of aero power and to the building of a sound aircraft industry for the defense and development of Canada.

ORENDA ENGINES LIMITED

DEDICATED TO CANADA'S JETPOWERED LEADERSHIP IN THE AIR

ORENDA IROQUOIS
Shucks! Our furniture craftsmen don’t expect this kind of gratitude. Their reward is in knowing that thousands of Canadian women appreciate the careful attention to detail which goes into every piece of KAUFMAN furniture. You’ll own it with pleasure and show it with pride because it’s created with care by KAUFMAN of Collingwood.
